

Biopsy Care Sheet

Clean each biopsy site twice a day with warm, soapy water then apply Vaseline ointment to the area. Apply a clean, dry dressing or bandage for 3-5 days.

Biopsy results take approximately 1-2 weeks. We will give you a call as soon as we receive your results at our office.

If you have NOT heard from us within 2 weeks, please call the office.

You may receive a separate bill from the lab or pathologist. Our office does not file or handle pathology claims from independent labs. Contact the lab directly with questions or concerns.
